

## **Assignment -1**

create function which takes file name as argument and return number of lines presents in the file.

```
#!/bin/bash
```

```
function count_lines() {
```

```
    Demo=$1
```

```
    if [ -f "$Demo" ];
```

```
    then
```

```
        lines=$(wc -l < "$Demo")
```

```
        echo "The file '$Demo' contains $lines lines."
```

```
    else
```

```
        echo "File '$Demo' does not exist."
```

```
    fi
```

```
}
```
