

## **Assignment -1**

**Ensure the script checks if a specific file (e.g., myfile.txt) exists in the current directory. If it exists, print "File exists", otherwise print "File not found".**

```
#!/bin/bash

file_name="demo.txt"

# Check if the file exists in the current directory

if [ -e "$file_name" ];

then

    echo "File exists"

else

    echo "File not found"

fi
```
